

(Exercise 12.04)

Implement the following flyweight. Note that objects from both `Programme` and `School` are shared objects. An example of a `Programme` is `code="ICT", title="ICT Engineering", headOfProgramme="SEK"` and an example of a `School` is `code="HJS", title="Horsens Junior School", type="Elementary School"`

(Exercise 12.05)

Implement the following flyweight
